

Conclusion: Why Science Needs Religion**Series: Where Science & Religion Meet**

- A. If you keep the _____ separate, there is no need to dismiss either science *or* religion as irrelevant, instead they are *both* helpful and necessary for understanding life and truth in our world
- B. It is exciting to consider the _____ for good that science might bring to our future, however, science *cannot* save us from our the fundamental problems of humanity
- C. There are just as many negative possibilities created by science & technology as there are positive possibilities
- D. We will only take the path of positive possibilities if the human race allows "healthy and balanced" _____ to be at the foundation of our daily decisions.
1. "Don't judge lest you be judged"
 2. "Love God, love one another, and love yourself"
 3. "Treat other people the way you want to be treated"
- E. If we were to choose God's path, which is a path that focuses on relationships and *people* instead of _____, what kind of difference would that make for our future as a human race, & also, what kind of difference might that make for us as individuals?
- F. Once you have the basic necessities, all you need to be truly happy are genuine & true relationships that are filled with love, warmth, and "hugs."
1. Don't always be hoping for the "upgrade"
 2. We are called to "Be Still & Be content"
- G. Science in & of itself does not have the _____ to lead us down the road to peace, contentment & authentic, loving relationships
- H: What is the single greatest problem of humanity?
- A: From the beginning of time, the human race hasn't learned how to love each other, God, or even ourselves like we should
1. There may be signs of physical evolution, but when it comes to the evolution of the human character, simply put, we haven't changed a bit.
- I. Underneath the circumstances, science, and technology, the essence of the human spirit, the soul, and life itself soul boils down to our _____ (with God, others, and self)
